STICKYBEAR® READING COMPREHENSION

Read a story!

Understand a story!

What is the Earth made of? If you were to dig a deep, deep hole, first you would see soil and rock. Soil and rock make up the Earth's crust. If you think of the Earth as an apple, Earth's crust would be the skin of the apple.
Below the crust, Earth is made of red-hot melted rock. This part of the Earth is like the white of the apple.

4. Earthquakes and volcanoes ___ .

A. are explosions

B. happen near mountains

C. can happen in the same places

ANSWER:

1. Earth's crust is like the _____ of an apple.

A. skin

B. white

C. core

ANSWER:

Improve reading skills with *Stickybear Reading Comprehension*, the amazing new multi-level reading comprehension program!

Begin with the more than 30 stories stored on the disk — each one high in kid-appeal, and approved by *Weekly Reader* editors! Then see if users can answer the comprehension questions that follow each story.

Teachers — or parents — can enter their own stories and questions, completely customizing the program for children. The story possibilities are endless.

Choose a grade level story — or create a story — about science...history... fiction...whatever *you* decide!

The handy, practical print-out feature allows kids to do student reports and teachers to create test masters on paper!

The program material is structured to appropriate grade levels 2 through 4. The computer automatically advances when children are ready to try another skill level...or an adult can choose the level a child is ready for.

Reading comprehension skill-building fun for ages 8-11

Ask about other exciting games and educational programs *Weekly Reader Family Software* has for the whole family.
